

EXHIBIT H

Table 4: Claims Having Original Terminology Only

Count 1	Patent (P) and Application (A) Claims
<p>261. A plurality of premixed aqueous compositions for forming an aqueous paint composition, the plurality of compositions comprising:</p> <p>a premixed pigment composition provided as an aqueous solution having an opacifying pigment;</p> <p>a premixed low resin composition provided as an aqueous solution having a flattening agent; and</p> <p>a premixed a binder composition provided as an aqueous solution having a resin;</p> <p>wherein mixing a portion of the pigment composition with a portion of at least one of the low resin composition and the binder composition produces the aqueous paint composition from the premixed compositions.</p>	<p>P1/A1</p> <p>P1. A set of different, but mutually compatible fluid prepaints, sufficient to form at least one paint line, which set comprises:</p> <p>(i) at least one opacifying prepaint comprising at least one opacifying pigment;</p> <p>(ii) at least one extender prepaint comprising at least one extender pigment; and</p> <p>(iii) at least one binder prepaint comprising at least one latex polymeric binder.</p>
<p>262. The plurality of premixed aqueous compositions of claim 261, wherein the number of premixed compositions is 3 or more.</p>	<p>P2/A2</p> <p>P2. The set of prepaints of claim 1, wherein the number of prepaints is from 3 to 15.</p>
<p>263. The plurality of premixed aqueous compositions of claim 261, wherein the premixed pigment composition further comprises at least one resin adsorbed onto the opacifying pigment.</p>	<p>P3/A3</p> <p>P3. The set of prepaints of claim 1, wherein the opacifying prepaint further comprises at least one particulate polymeric binder adsorbed onto the opacifying pigment.</p>

Count 1	Patent (P) and Application (A) Claims
<p>264. The plurality of premixed aqueous compositions of claim 261, wherein the premixed low resin composition further comprises at least one particulate resin absorbed onto the flattening agent.</p>	<p>P4/A4</p> <p>P4. The set of prepaints of claim 1, wherein the extender prepaint further comprises at least one particulate polymeric binder absorbed onto the extender pigment.</p>
<p>265. The plurality of premixed aqueous compositions of claim 261, wherein the premixed low resin composition has a PVC of about 35% to about 100%.</p>	<p>P49. The set of prepaints of claim 1 wherein the extender prepaint has a PVC of about 35% to about 100%.</p>
<p>266. An aqueous paint product made by a method comprising:</p> <p>premixing a pigment composition as an aqueous solution having an opacifying pigment;</p> <p>premixing a low resin composition as an aqueous solution having a flattening agent;</p> <p>premixing a binder composition as an aqueous solution having a resin; and</p> <p>mixing a portion of the pigment composition with a portion of at least one of the low resin composition and the binder composition to produce an aqueous paint composition from the premixed compositions.</p>	<p>P38/A44</p> <p>P38. A paint line produced by a process which comprises the steps of:</p> <p>a. providing a set of different, but mutually compatible, fluid prepaints, which set comprises:</p> <ul style="list-style-type: none"> (i) at least one opacifying prepaint comprising at least one opacifying pigment, (ii) at least one extender prepaint comprising at least one extender pigment, and (iii) at least one binder prepaint comprising at least one latex polymeric binder; and <p>b. dispensing a predetermined amount of each of the prepaints into containers or applicators to form the paint line.</p>

Count 1	Patent (P) and Application (A) Claims
<p>267. An aqueous paint composition comprising:</p> <p>a premixed pigment composition as an aqueous solution having an opacifying pigment;</p> <p>a premixed low resin composition as an aqueous solution having a flattening agent;</p> <p>a premixed binder composition as an aqueous solution having a resin; and</p> <p>a portion of the pigment composition mixed with a portion of at least one of the low resin composition and the binder composition to produce the aqueous paint composition from the premixed compositions.</p>	<p>P45. A set of different, but mutually compatible, fluid prepaints sufficient to formulate at least one paint line useful for forming pigmented and clear coatings, which set comprises:</p> <p>(i) at least one prepaint comprising at least one opacifying pigment; and</p> <p>(ii) at least two prepaints each of which comprises at least one latex polymeric binder.</p>
<p>268. A method of forming a plurality of paint products, which method comprises the steps of:</p> <p>(a) providing a plurality of the premixed compositions of claim 267; and</p> <p>(b) dispensing a predetermined amount of each of the premixed compositions into containers to form the plurality of paint products.</p>	<p>P48. A method of forming at least one paint line, which method comprises the steps of:</p> <p>(a) providing the set of prepaints of claim 45, 46 or 47; and</p> <p>(b) dispensing a predetermined amount of each of the prepaints into containers or applicators to form the paint line.</p>

Count 2	Patent (P) and Application (A) Claims
<p>269. A method of producing a plurality of aqueous paint products, the method comprising:</p> <p>premixing an opacifying pigment composition as an aqueous solution having an opacifying pigment;</p> <p>premixing a low resin composition as an aqueous solution having a flattening agent;</p> <p>premixing a binder composition as an aqueous solution having a resin; and</p> <p>mixing a portion of the pigment composition with a portion of at least one of the low resin composition and the binder composition in containers to produce an aqueous paint product of the plurality of paint products from the premixed compositions.</p>	<p>P5/A5</p> <p>P5. A method of forming at least one paint line, comprising the steps of:</p> <p>(a) providing a set of different, but mutually compatible, fluid prepaints, comprising:</p> <p>(i) at least one opacifying prepaint, comprising at least one opacifying pigment;</p> <p>ii) at least one extender prepaint comprising at least one extender pigment; and</p> <p>(iii) at least one binder prepaint comprising at least one latex polymeric binder; and</p> <p>(b) dispensing a predetermined amount of each of the prepaints into containers or applicator(s) to form the paint line.</p>
<p>270. The method of claim 269, further comprising the step of mixing the premixed compositions before, while, or after they are dispensed into the containers.</p>	<p>P7/A7</p> <p>P7. The method of claim 5, further comprising the step of mixing the prepaint before, while, or after they are dispensed into the containers.</p>
<p>271. The method of claim 269, further comprising the step of mixing the premixed compositions before or while they are dispensed into the containers.</p>	<p>P8/A8</p> <p>P8. The method of claim 5, further comprising the step of mixing the prepaint before or while they are dispensed into the applicator(s).</p>

Count 2	Patent (P) and Application (A) Claims
272. The method of claim 269, further comprising the step of adjusting the viscosity of the premixed compositions before, while, or after they are dispensed into the containers.	P9/A9 P9. The method of claim 5, further comprising the step of adjusting the viscosity of the prepaints before, while, or after they are into the containers.
273. The method of claim 269, further comprising the step of adjusting the viscosity of the premixed compositions before or while they are dispensed into the containers.	P10/A10 P10. The method of claim 5, further comprising the step of adjusting the viscosity of the dispensed prepaints before or while they are dispensed into the applicator(s).
274. The method of claim 269, further comprising the step of adding at least one additive that enhances application or final performance of the aqueous paint product .	P11/A11 P11. The method of claim 5, further comprising the step of adding at least one additive that enhances application or final performance of the paint .
275. The method of claim 274, wherein the additive is a thickener.	P13/A13 P13. The method of claim 11, wherein the additive is a thickener.
276. The method of claim 269, further comprising the step of adding at least one colorant to the premixed compositions .	P14/A14 P14. The method of claim 5, further comprising the step of adding at least one colorant to the prepaints .
277. The method of claim 269, wherein the opacifying pigment composition further comprises at least one resin absorbed onto the opacifying pigment.	P15/A15 P15. The method of claim 5, wherein the opacifying prepaint further comprises at least one particulate polymeric binder absorbed onto the opacifying pigment.

Count 2	Patent (P) and Application (A) Claims
278. The method of claim 269, wherein the low resin composition further comprises at least one resin absorbed onto the flattening agent .	P16/A16 P16. The method of claim 5, wherein the extender prepaint further comprises at least one particulate polymeric binder absorbed onto the extender pigment
279. The method of claim 269, wherein the method is carried out at a paint manufacturing facility.	P17/A17 P17. The method of claim 5, wherein the method is carried out at a paint manufacturing facility.
280. The method of claim 269, wherein the number of premixed compositions is 4 or more.	P18/A21 P18. The method of claim 5, wherein the number of prepaints is from 4 to 15.
281. The method of claim 269, wherein the low resin composition has a PVC of about 35% to about 100%.	P50. The method of forming at least one paint line of claim 5 wherein the extender prepaint has a PVC of about 35% to about 100%.
282. The method of claim 269, wherein the method is carried out at the point-of-sale.	A18. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-sale.
283. The method of claim 269, wherein the method is carried out at the point-of-use.	A19. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-use.
284. The method of claim 269, wherein the method is controlled by a computer.	A20. The method of claim 5 or claim 6, wherein the method is controlled by a computer.

Count 2	Patent (P) and Application (A) Claims
<p>285. A method of producing variations of a plurality of aqueous paint products, the method comprising:</p> <ul style="list-style-type: none"> (i) premixing an opacifying pigment composition as an aqueous solution having an opacifying pigment; (ii) premixing a low resin composition as an aqueous solution having a flattening agent; (iii) premixing a binder composition as an aqueous solution having a resin; and (iv) premixing an additional different premixed composition from the group consisting of the compositions of (i), (ii), and (iii); and <p>mixing a portion of the pigment composition with a portion of at least one of the low resin composition and the binder composition in containers to produce an aqueous paint product of the variations of the plurality of paint products from the premixed compositions.</p>	<p>P6/A6</p> <p>A6. A method of forming a range of paints, the range comprising at least two paint lines, which method comprises the steps of:</p> <ul style="list-style-type: none"> (a) providing a set of different, but mutually compatible, fluid prepaints sufficient to formulate at least two paint lines, which set comprises: <ul style="list-style-type: none"> (i) at least one opacifying prepaint comprising at least one opacifying pigment; (ii) at least one extender prepaint comprising at least one extender pigment; (iii) at least one binder prepaint comprising at least one latex polymeric binder; and (iv) at least one additional, different opacifying, extender, or binder prepaint selected from the group consisting of (i), (ii), and (iii); and (b) dispensing a predetermined amount of each of the prepaints into containers or applicator(s) to form the range of paints.
<p>286. The method of claim 285, further comprising the step of mixing the premixed compositions before, while, or after they are dispensed into the containers.</p>	<p>P7/A7</p> <p>A7. The method of claim 5 or claim 6, further comprising the step of mixing the prepaint before, while, or after they are dispensed into the containers.</p>

Count 2	Patent (P) and Application (A) Claims
287. The method of claim 285, further comprising the step of mixing the premixed compositions before or while they are dispensed into the containers.	P8/A8 A8. The method of claim 5 or claim 6, further comprising the step of mixing the prepaint before or while they are dispensed into the applicator(s).
288. The method of claim 285, further comprising the step of adjusting the viscosity of the premixed compositions before, while, or after they are dispensed into the containers.	P9/A9 A9. The method of claim 5 or claim 6, further comprising the step of adjusting the viscosity of the prepaints before, while, or after they are into the containers.
289. The method of claim 285, further comprising the step of adjusting the viscosity of the premixed compositions before or while they are dispensed into the containers.	P10/A10 A10. The method of claim 5 or claim 6, further comprising the step of adjusting the viscosity of the dispensed prepaints before or while they are dispensed into the applicator(s).
290. The method of claim 285, further comprising the step of adding at least one additive that enhances application or final performance of the aqueous paint product .	P11/A11 A11. The method of claim 5 or claim 6, further comprising the step of adding at least one additive that enhances application or final performance of the paint .
291. The method of claim 290, wherein the additive is a thickener.	P13/A13 A13. The method of claim 11, wherein the additive is a thickener.

Count 2	Patent (P) and Application (A) Claims
292. The method of claim 285, further comprising the step of adding at least one colorant to the premixed compositions .	P14/A14 A14. The method of claim 5 or claim 6, further comprising the step of adding at least one colorant to the prepaints .
293. The method of claim 285, wherein the opacifying pigment composition further comprises at least one resin absorbed onto the opacifying pigment.	P15/A15 A15. The method of claim 5 or claim 6, wherein the opacifying prepaint further comprises at least one particulate polymeric binder absorbed onto the opacifying pigment.
294. The method of claim 285, wherein the low resin composition further comprises at least one resin absorbed onto the flattening agent .	P16/A16 A16. The method of claim 5 or claim 6, wherein the extender prepaint further comprises at least one particulate polymeric binder absorbed onto the extender pigment .
295. The method of claim 285, wherein the method is carried out at a paint manufacturing facility.	P17/A17 A17. The method of claim 5 or claim 6, wherein the method is carried out at a paint manufacturing facility.
296. The method of claim 285, wherein the number of premixed compositions is 4 or more.	P18/A21 A21. The method of claim 5 or claim 6, wherein the number of prepaints is from 4 to 15.
297. The method of claim 285, wherein the low resin composition has a PVC of about 35% to about 100%.	P50. The method of forming at least one paint line of claim 5 wherein the extender prepaint has a PVC of about 35% to about 100%.

Count 2	Patent (P) and Application (A) Claims
298. The method of claim 285, wherein the method is carried out at the point-of-sale.	A18. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-sale.
299. The method of claim 285, wherein the method is carried out at the point-of-use.	A19. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-use.
300. The method of claim 285, wherein the method is controlled by a computer.	A20. The method of claim 5 or claim 6, wherein the method is controlled by a computer.

Count 3	Patent (P) and Application (A) Claims
<p>301. A premixed aqueous composition for forming an aqueous paint product, the premixed composition comprising:</p> <p>a premixed pigment composition provided as an aqueous solution having:</p> <p>an opacifying pigment;</p> <p>a dispersant-thickener comprising:</p> <p>a dispersant,</p> <p>a thickener; and</p> <p>water;</p> <p>wherein mixing a portion of the pigment composition with other paint ingredients provides the aqueous paint composition.</p>	<p>P19/A22</p> <p>P19. A fluid opacifying prepaint useful for formulating a one pack, pigmented latex paint having a volume solids content of about 30% to about 70% and a Stormer viscosity of about 50 to about 250 KU, which prepaint contains other paint ingredients, which prepaint consists essentially of:</p> <p>(i) at least one opacifying pigment,</p> <p>(ii) at least one dispersant,</p> <p>(iii) at least one thickener, and</p> <p>(iv) water;</p> <p>wherein the dispersant(s) and the thickener(s) are mutually compatible with the pigment(s) and with the other paint ingredients.</p>

Count 3	Patent (P) and Application (A) Claims
<p>302. The premixed aqueous composition of claim 301, wherein the volume solids content is about 35% to about 50% and the Stormer viscosity is about 60 to about 150 KU.</p>	<p>P20/A23</p> <p>P20. The prepaint of claim 19, wherein the volume solids content is about 35% to about 50% and the Stormer viscosity is about 60 to about 150 KU.</p>
<p>303. The premixed aqueous composition of claim 301, wherein the opacifying pigment comprises titanium dioxide.</p>	<p>P24/A27</p> <p>P24. The prepaint of claim 19 or 21, wherein the opacifying pigment is a material selected from the group consisting of titanium dioxide, zinc oxide, lead oxide, a synthetic polymer pigment, and mixtures thereof.</p>
<p>304. The premixed aqueous composition of claim 301, wherein the dispersant comprises potassium tripolyphosphate.</p>	<p>P27/A30</p> <p>P27. The prepaint of claim 19 or 21, wherein the dispersant is a selected from the group consisting of 2-amino-2-methyl-1-propanol; dimethylaminoethanol; potassium tripolyphosphate; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof.</p>

Count 3	Patent (P) and Application (A) Claims
<p>305. The premixed aqueous composition of claim 301, wherein the thickener comprises a cellulosic.</p>	<p>P28/A31</p> <p>P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swallowable emulsion (ASE), a hydrophobically-modified, alkali-soluble emulsion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgate clay, a titanate chelating agent, and mixtures thereof.</p>
<p>306. The premixed aqueous composition of claim 301, further consisting essentially of at least one additive comprising a coalescent, with the additive being present in an amount of less than about 10% by weight, based on the total weight of the premixed aqueous composition.</p>	<p>P30/A34</p> <p>P30. The prepaint of claim 19 or 21, further consisting essentially of at least one additive selected from the group consisting of an acid, a base, a defoamer, a coalescent, a cosolvent, a mildewcide, a biocide, and an antifreeze agent, with the additive being present in an amount of less than about 10% by weight, based on the total weight of the prepaint.</p>

Count 3	Patent (P) and Application (A) Claims
<p>307. A plurality of different, but mutually compatible premixed aqueous compositions useful for formulating a paint product, which plurality comprises:</p> <p>(a) the premixed opacifying aqueous composition of claim 301; and</p> <p>(b) a premixed binder composition having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which binder composition consists essentially of a water-borne resin having a Tg of about -430.degree. C. to about 70.degree. C. and water;</p> <p>wherein the ingredients of the premixed compositions are mutually compatible with each other and with the ingredients of the other premixed compositions of the plurality.</p>	<p>P32/A31</p> <p>P32. A set of two different, but mutually compatible binder prepaints useful for formulating a latex paint, which set comprises:</p> <p>(a) the opacifying prepaint of claim 19 or 21; and</p> <p>(b) a latex polymeric binder prepaint having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which prepaint consists essentially of a water-borne latex polymeric binder having a Tg of about -430.degree. C. to about 70.degree. C. and water;</p> <p>wherein the prepaint ingredients are mutually compatible with each other and with the ingredients of the other prepaint in the set.</p>

Count 3	Patent (P) and Application (A) Claims
<p>308. The set of premixed aqueous compositions of claim 307, wherein the premixed binder composition has a volume solids content of about 30 to about 65% and a Brookfield viscosity of about 100 to about 50,000 centipoise at a shear rate of 1.25 reciprocal seconds, and consists essentially of a water-borne resin having a Tg of about -10 to about 60.degree. C.</p>	<p>P33/A38</p> <p>P33. The set of prepaints of claim 32, wherein the binder prepaint has a volume solids content of about 30 to about 65% and a Brookfield viscosity of about 100 to about 50,000 centipoise at a shear rate of 1.25 reciprocal seconds, and consists essentially of a water-borne polymeric binder having a Tg of about -10 to about 60.degree. C.</p>
<p>309. The set of premixed fluid compositions of claim 307, wherein the premixed binder composition further consists essentially of at least one additive comprising a coalescent, the additive being present in an amount of less than about 10% by weight, based on the total weight of the premixed binder composition.</p>	<p>P34/A39</p> <p>P34. The set of prepaints of claim 32, wherein the binder prepaint further consists essentially of at least one additive selected from the group consisting of an acid, a base, a defoamer, a coalescent, a cosolvent, a mildewcide, a biocide, and antifreeze agent, the additive being present in an amount of less than about 10% by weight, based on the total weight of the prepaint.</p>

Count 3	Patent (P) and Application (A) Claims
<p>310. A plurality of different, but mutually compatible, premixed compositions, useful for formulating a paint product, which plurality comprises:</p> <p>(a) the plurality of premixed fluid compositions of claim 307; and</p> <p>(b) a premixed aqueous pigment extender composition which consists essentially of:</p> <p>(i) at least one flattening agent,</p> <p>(ii) at least one thickener,</p> <p>(iii) water, and</p> <p>(iv) optionally a resin;</p> <p>wherein the premixed extender composition has a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU.</p>	<p>P35/A40, A41</p> <p>P35. A set of three different, but mutually compatible, fluid prepaints, useful for formulating a latex paint, which set comprises:</p> <p>(a) the set of prepaints of claim 32 wherein the extender prepaint has a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU; and</p> <p>(b) a fluid pigment extender prepaint which consists essentially of:</p> <p>(i) at least one mineral extender,</p> <p>(ii) at least one thickener,</p> <p>(iii) water, and</p> <p>(iv) optionally a polymeric binder.</p>

Count 3	Patent (P) and Application (A) Claims
<p>311. The plurality of premixed compositions of claim 310, wherein the premixed extender composition has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.</p>	<p>P36/A42</p> <p>P36. The set of preprints of claim 35, wherein the extender preprint has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.</p>
<p>312. The plurality of premixed compositions of claim 307, wherein the premixed binder composition further consists essentially of at least one additive comprising a coalescent, with the additive being present in an amount of less than about 20% by weight, based on the total weight of the binder composition.</p>	<p>P37/A43</p> <p>P37. The set of preprints of claim 32, wherein the extender preprint further consists essentially of at least one additive selected from the group consisting of an acid, a base, a defoamer, a coalescent, a cosolvent, a mildewcide, a biocide and an antifreeze agent with the additive being present in an amount of less than about 20% by weight, based on the total weight of preprint.</p>

Count 3	Patent (P) and Application (A) Claims
<p>313. A premixed aqueous pigment paint composition having a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU, useful for formulating an aqueous pigmented paint product containing other paint ingredients, the premixed pigment composition provided as an aqueous solution comprising:</p> <p>a pigment;</p> <p>a dispersant-thickener comprising:</p> <p>a dispersant, and</p> <p>a thickener;</p> <p>a resin, and</p> <p>water;</p> <p>wherein mixing a portion of the pigment composition with the other paint ingredients provides the aqueous paint product.</p>	<p>P21/A24</p> <p>P21. A fluid white opacifying prepaint having a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU, useful for formulating a one pack, pigmented latex paint containing other paint ingredients, which prepaint consists essentially of:</p> <p>(i) at least one opacifying pigment,</p> <p>(ii) at least one dispersant,</p> <p>(iii) at least one thickener,</p> <p>(iv) at least one film-forming or non-film-forming polymer, and</p> <p>(v) water; wherein the dispersant(s), the thickener(s), and the polymer(s) are compatible with the pigment(s) and with the other paint ingredients and wherein the prepaint is stable to sedimentation.</p>

Count 3	Patent (P) and Application (A) Claims
<p>314. The premixed aqueous composition of claim 313, wherein the volume solids content is about 35% to about 50%, the PVC is about 50 to about 100%, and the Stormer viscosity is about 60 to about 150 KU.</p>	<p>P22/A25</p> <p>P22. The prepaint of claim 21, wherein the volume solids content is about 35% to about 50%, the PVC is about 50 to about 100%, and the Stormer viscosity is about 60 to about 150 KU.</p>
<p>315. The premixed aqueous composition of claim 313, wherein the resin is adsorbed onto the pigment.</p>	<p>P23/A26</p> <p>P23. The prepaint of claim 21, wherein the polymer is adsorbed onto the opacifying pigment.</p>
<p>316. The premixed aqueous composition of claim 313, wherein the pigment comprises titanium dioxide.</p>	<p>P24/A27</p> <p>P24. The prepaint of claim 19 or 21, wherein the opacifying pigment is a material selected from the group consisting of titanium dioxide, zinc oxide, lead oxide, a synthetic polymer pigment, and mixtures thereof.</p>

Count 3	Patent (P) and Application (A) Claims
<p>317. The premixed aqueous composition of claim 313, wherein the dispersant comprises potassium tripolyphosphate.</p>	<p>P27/A30</p> <p>P27. The prepaint of claim 19 or 21, wherein the dispersant is a selected from the group consisting of 2-amino-2-methyl-1-propanol; dimethylaminoethanol; potassium tripolyphosphate; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof.</p>
<p>318. The premixed aqueous composition of claim 313, wherein the thickener comprises a cellulosic.</p>	<p>P28/A31</p> <p>P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellaable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgitic clay, a titanate chelating agent, and mixtures thereof.</p>

Count 3	Patent (P) and Application (A) Claims
<p>319. The premixed aqueous composition of claim 313, wherein the resin comprises acrylics.</p>	<p>P29/A32, A33</p> <p>P29. The prepaint of claim 21, wherein the polymer is selected from the group consisting of acrylic, polyvinyl acetate, styrene-acrylic, styrene-butadiene, vinyl acetate-acrylic, ethylene-vinyl acetate, vinyl acetate-vinyl versatate, vinyl acetate-vinyl maleate, vinyl acetate-vinyl chloride-acrylic, ethylene-vinyl acetate-acrylic polymers and mixtures thereof and wherein the polymer further comprises up to about 10% by weight of the polymer of a monomer selected from the group consisting of a functional monomer, a co-monomer, and combinations thereof.</p>
<p>320. The premixed aqueous composition of claim 313, further consisting essentially of at least one additive comprising a coalescent, with the additive being present in an amount of less than about 10% by weight, based on the total weight of the premixed aqueous composition.</p>	<p>P30/A34</p> <p>P30. The prepaint of claim 19 or 21, further consisting essentially of at least one additive selected from the group consisting of an acid, a base, a defoamer, a coalescent, a cosolvent, a mildewcide, a biocide, and an antifreeze agent, with the additive being present in an amount of less than about 10% by weight, based on the total weight of the prepaint.</p>

Count 3	Patent (P) and Application (A) Claims
<p>321. A plurality of different, but mutually compatible premixed aqueous compositions useful for formulating a paint product, which plurality comprises:</p> <p>(a) the premixed aqueous composition of claim 313; and</p> <p>(b) a premixed binder composition having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which binder composition consists essentially of a water-borne resin having a Tg of about -430.degree. C. to about 70.degree. C. and water;</p> <p>wherein the ingredients of the premixed compositions are mutually compatible with each other and with the ingredients of the other premixed compositions in the plurality.</p>	<p>P32/A37</p> <p>P32. A set of two different, but mutually compatible binder prepaints useful for formulating a latex paint, which set comprises:</p> <p>(a) the opacifying prepaint of claim 19 or 21; and</p> <p>(b) a latex polymeric binder prepaint having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which prepaint consists essentially of a water-borne latex polymeric binder having a Tg of about -430.degree. C. to about 70.degree. C. and water;</p> <p>wherein the prepaint ingredients are mutually compatible with each other and with the ingredients of the other prepaint in the set.</p>

Count 3	Patent (P) and Application (A) Claims
<p>322. The plurality of premixed aqueous compositions of claim 321, wherein the premixed binder composition has a volume solids content of about 30 to about 65% and a Brookfield viscosity of about 100 to about 50,000 centipoise at a shear rate of 1.25 reciprocal seconds, and consists essentially of a water-borne resin having a Tg of about -10 to about 60.degree. C.</p>	<p>P33/A38</p> <p>P33. The set of prepaints of claim 32, wherein the binder prepaint has a volume solids content of about 30 to about 65% and a Brookfield viscosity of about 100 to about 50,000 centipoise at a shear rate of 1.25 reciprocal seconds, and consists essentially of a water-borne polymeric binder having a Tg of about -10 to about 60.degree. C.</p>
<p>323. The plurality of premixed aqueous compositions of claim 322, wherein the premixed binder composition further consists essentially of at least one additive comprising a coalescent, the additive being present in an amount of less than about 10% by weight, based on the total weight of the premixed binder composition.</p>	<p>P34/A39</p> <p>P34. The set of prepaints of claim 32, wherein the binder prepaint further consists essentially of at least one additive selected from the group consisting of an acid, a base, a defoamer, a coalescent, a cosolvent, a mildewcide, a biocide, and antifreeze agent, the additive being present in an amount of less than about 10% by weight, based on the total weight of the prepaint.</p>

Count 3	Patent (P) and Application (A) Claims
<p>324. A plurality of different, but mutually compatible, premixed aqueous compositions, useful for formulating an aqueous paint product, which plurality comprises:</p> <p>(a) the plurality of premixed aqueous compositions of claim 322; and</p> <p>(b) a premixed aqueous pigment extender composition which consists essentially of:</p> <p>(i) at least one flattening agent,</p> <p>(ii) at least one thickener,</p> <p>(iii) water, and</p> <p>(iv) optionally a resin;</p> <p>wherein the premixed binder composition has a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU.</p>	<p>P35/A40, A41</p> <p>P35. A set of three different, but mutually compatible, fluid prepaints, useful for formulating a latex paint, which set comprises:</p> <p>(a) the set of prepaints of claim 32 wherein the extender prepaint has a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU; and</p> <p>(b) a fluid pigment extender prepaint which consists essentially of:</p> <p>(i) at least one mineral extender,</p> <p>(ii) at least one thickener,</p> <p>(iii) water, and</p> <p>(iv) optionally a polymeric binder.</p>

Count 3	Patent (P) and Application (A) Claims
<p>325. The plurality of premixed aqueous compositions of claim 324, wherein the premixed extender composition has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.</p>	<p>P36/A42</p> <p>P36. The set of prepaints of claim 35, wherein the extender prepaint has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.</p>
<p>326. The plurality of premixed aqueous compositions of claim 321, wherein the premixed binder composition further consists essentially of at least one additive comprising a coalescent, with the additive being present in an amount of less than about 20% by weight, based on the total weight of the premixed binder composition.</p>	<p>P37/A43</p> <p>P37. The set of prepaints of claim 32, wherein the extender prepaint further consists essentially of at least one additive selected from the group consisting of an acid, a base, a defoamer, a coalescent, a cosolvent, a mildewcide, a biocide and an antifreeze agent with the additive being present in an amount of less than about 20% by weight, based on the total weight of prepaint.</p>

Count 4	Patent (P) and Application (A) Claims
<p>327. An aqueous solution having a premixed pigment extender composition, useful for producing a paint product containing other premixed compositions, the aqueous solution comprising:</p> <ul style="list-style-type: none"> (i) a flattening agent; (ii) a dispersant thickening dilutant composition having a thickener, (iii) water, and (iv) optionally a resin; wherein the premixed extender composition ingredients are compatible with each other. 	<p>P31/A35, A36</p> <p>P31. A fluid pigment extender prepaint, useful for formulating a one pack, pigmented latex paint containing other paint ingredients, which prepaint consists essentially of</p> <ul style="list-style-type: none"> (i) at least one mineral extender having a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU; (ii) at least one thickener, (iii) water, and (iv) an optional polymeric binder; wherein the prepaint ingredients are compatible with each other and with the ingredients of the paint.
